

INSTRUCTOR BACK GROUND

Allen Tonn

Allen Tonn has been actively involved with emergency services for over 17 years, including Fire/Rescue and Search & Rescue. His current role with KGC Fire Rescue Inc. has given him access to new car technologies, as well as the latest developments in hydraulic rescue tools, both in Canada and the USA. He has been involved in scenario design and construction in many auto extrication competitions at both a regional and national level. This allows him to stay current with the latest techniques in extrication.

Allen currently participates as a rescue technician, specialist and incident commander in several rescue disciplines including wilderness/urban SAR, rope rescue, and swiftwater. He also instructs other rescue organizations to a NFPA level in auto extrication, rope rescue, and several other technical disciplines.
